

## Professional Experience

Nick has over 12 years of professional experience across urban design and planning, landscape design and master planning projects located in Australia, Europe and the Middle East.

With his background in landscape architecture and appreciation of public domain design; Nick provides an important contribution and key specialism to the Architectus urban design and planning team.

Nick has worked across many industry sectors with both government and private clients and often as part of large multi disciplinary teams. As a project manager and design leader, Nick has guided clients and project teams through complex planning proposals and urban design strategies with a clear vision for functionality and design excellence.

**Eastlakes Master Planning and Rezoning, Sydney.** Urban design study and options as part of a state government divestment project to rezone a strategically important site to mix use/ high density residential development, including collaborative discussions with Botany Bay Council and public consultation events.

**Sutherland to Cronulla Active Transport Link.** Urban design and hard landscape/public domain design for a 10km cycle link for TfNSW linking a series of local centres along an existing rail corridor and street network. Detailed review and selection of the preferred route alignment, materials finishes and landscape coordination.

**Parramatta Light Rail.** Urban design input into the definition design stage of this major TfNSW project including route assessment and recommendations, precinct strategies and design options testing to inform project coordination and stakeholder engagement.

**Port Moresby Master Plan, Papua New Guinea.** Urban design and master plan vision for the future redevelopment of the Port including a new passenger terminal, extensive public domain and high density mixed use development.

**DHA Stockton Residential Master Plans, Stockton NSW.** Urban design and master planning for the rezoning of two defence sites on environmental and historically significant sites close to Newcastle CBD, including developing site specific housing typologies and lot layouts that were sympathetic to the sensitive coastal environment.

**L&HC Sites Botany Bay, Sydney.** Urban design block modelling study to test the suitability of 7 Land and Housing Commission sites for future redevelopment. The work was used to ensure existing planning controls were suitable to allow for future flexibility for Land and Housing Commission in managing these important community assets.

**Western Sydney Airport Rail Link.** Urban design advice and public domain concepts to support early feasibility work around the future rail link and stations for the planned airport.

**Raghadan and Hashemite Plaza Downtown Regeneration, Amman, Jordan (LoveJoy).** Detailed landscape and public domain design for a large historical plaza and parkland in downtown Amman, including extensive hard and soft landscape detailing and interfaces with sensitive heritage structures dating back to Roman times.
